ASMAT ULLAH

FULL-STACK DEVELOPER | MERN STACK – Experience 1.5 Year

Faisalabad, Pakistan | +92 333 898 9937 | mrverak@gmail.com

Linkedin | Github | Upwork

PROFESSIONAL SUMMARY

Full-Stack Developer with **1.5 year** of hands-on experience building web applications with the MERN stack (MongoDB, Express.js, React.js / Next.js and Node.js), complemented by a broader background in web application development using PHP-based frameworks and modern JavaScript technologies. Experienced in developing responsive interfaces, RESTful APIs, database-backed features and admin workflows. Familiar with Next.js, Redux Toolkit, Zustand, Zod, Mongoose and Docker containerization. Focused on maintainable code, practical problem-solving and reliable end-to-end delivery.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, responsive UI, React Router

State & Forms: Redux Toolkit, Zustand, React Context, React Hook Form, Zod validation

Backend: Node.js, Express.js, REST API design, middleware, authentication and authorization, input validation

Database: MongoDB, Mongoose, schema design, CRUD operations, aggregation basics, indexing fundamentals

DevOps & Tools: Docker, Docker Compose, containerization, Git, GitHub, npm, Postman, VS Code

Additional Web Development: PHP, Laravel, Symfony, MySQL, PostgreSQL (include only technologies you can confidently discuss)

AI TOOL AND EXPERIENCES: CODEX, CURSOR, CODE USING ai, AI APIs utilization

COMMUNICATION: Can engage with clients very professional English accent. Effective communication.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — MERN Stack | Self-Employed

[Jan 2025] – [Jul 2026] | Remote

- Developed and maintained full-stack web application features using React.js / Next.js on the frontend and Node.js / Express.js on the backend.
- Designed and integrated RESTful APIs, connecting user interfaces with MongoDB data models managed through Mongoose.
- Implemented reusable React components, responsive layouts, client-side routing and application state using Redux Toolkit and Zustand.
- Applied schema-based validation with Zod and structured backend request validation to improve data consistency.
- Worked with authentication flows, protected application areas, role-aware interfaces and admin functionality as required by project needs.
- Used Docker-based containerization to package application services and support consistent development and deployment environments.
- Tested API behavior with Postman, used Git for source control, and debugged issues across frontend, backend and database layers.

SELECTED PROJECT

LookStitch — E-commerce Platform | Live project

Storefront: https://lookstitch.com

Admin portal: https://lookstitch.com/stealthadmin

- Built and developed a live e-commerce project with a customer-facing storefront and a separate administration portal.
- Applied modern React / Next.js application development and a Node.js-oriented backend architecture with MongoDB data storage.
- Worked across the end-to-end application workflow, including frontend implementation, backend/API integration and database-backed functionality.
- Designed the project to support an online retail experience and administrative management; add specific modules, integrations and measurable results here only where personally implemented.

ADDITIONAL EXPERIENCE

Web Application Development — PHP / JavaScript | 10+ years' broader development background

Additional professional development experience with PHP and PHP frameworks, alongside JavaScript-based frontend development. Relevant technologies include Laravel, Symfony, React.js, Next.js, REST APIs and relational databases.

EDUCATION

[BSCS] | [ALLAM IQBAL OPEN UNIVERSITY], [ISLAMABAD, PAKISTAN] | [2006]
